## **What Happens in Vegas**

Enormous and eye-poppingly opulent, Sin City spas are setting a new standard for indulgence.

But beyond their size and extravagance, what really distinguishes Vegas spas from their counterparts elsewhere is their attitude. In general, these are not zen sanctuaries where guests come seeking peace and quiet. Instead, people-watching and even people-meeting share top billing with relaxation. “There’s a voyeuristic aspect to it,” says Anna Lempereur Moine, a branding and marketing consultant who specializes in spas. “It’s a place to see and be seen.”
